Subject: Microsoft Settlement

Requiring that Microsoft provide copies of Microsoft Windows, Microsoft application, Windows computers, and cash to schools only serve to further propagate their monopoly. This will not really punish Microsoft.

Rather than requiring something that will end up supporting Microsoft's agenda, instead Microsoft should be required to purchase copies of the Mac OS, non-Microsoft applications for the Macintosh, Apple Macintosh computers and give them to the schools.

Respectfully submitted,
Cal Simone, luminary
Washington, D.C.
